CALCIUM D3 Forte Food supplement

The product is intended for people during period of intense growth and development, for pregnant and breastfeeding women as well as for women during the menopause and the elderly.

Recommended use: take 1-2 tablets a day, after a meal. Tablets should be taken with an adequate amount of water. Do not exceed the recommended daily dose. Food supplements should not be used as a substitute for a varied and balanced diet. A varied and balanced diet and a healthy lifestyle are recommended.

Ingredients: calcium carbonate - calcium, bulking agent - cellulose; coating [glazing agents - polyvinyl alcohol (PVA), polyethylene glycol, talc]; bulking agent - cross-linked sodium carboxy methyl cellulose; anti-caking agent - magnesium salts of fatty acids; cholecalciferol - vitamin D.

CALCIUM D3 Forte - food supplement in a form of coated tablets, containing a high dose of calcium and vitamin D - essential components in the body that are needed for the maintenance of normal bones and teeth. Calcium is the main mineral component of bone tissue. In addition, calcium contributes to normal neuromuscular transmission and normal blood clotting.

Nutrition information

	1 tablet	2 tablets
Calcium	625 mg (78%*)	1250 mg (156%*)
Vitamin D	10 µg (200%*)	20 µg (400%*)

*NRVs - nutrient reference values.

Vitamin D contributes to normal absorption and utilisation of calcium and phosphorus, and normal blood calcium levels. Vitamin D contributes to the normal function of the immune system, and similar to calcium, contributes to the maintenance of normal muscle function. Calcium and vitamin D are needed for normal growth and development of bone in children.
