

Olimp Labs

Albion™ is a trademark of Balchem Corporation or its subsidiaries.

Food supplement containing a highly absorbable form of magnesium - amino acid chelate Albion™ with vitamin D3 at the level of 2000 IU as well as vitamin B6 and K2. Magnesium plays an essential role in the biosynthesis of vitamin D active form. Scientific research suggests that intake of magnesium from diet or food supplements reduces the probability of vitamin D deficiency in the body and related consequences (Deng et al. BMC Medicine 2013, 11:187; J Am Osteopath Assoc. 2018;118(3):181-189). Moreover, vitamin D can stimulate intestinal absorption of magnesium (Brannan et al. 1976 Jun; 57(6): 1412-1418). The product is recommended to adults to supplement the diet with magnesium as well as vitamins D, B6 and K.

Nutrition Information	1 capsule
Magnesium	100 mg (27%*)
Vitamin D (D3)	50 µg (2000 IU) (1000%*)
Vitamin B6	2,1 mg (150%*)
Vitamin K (K2)	11,25 µg (15%*)

\*NRVs - nutrient reference values.
