Chela-Mag B6™ Cramp

Food supplement in the form of effervescent tablets, containing magnesium in the form of amino acid chelate Albion™, potassium and vitamins: B1, B2, B3, B6, B12 and biotin.

Magnesium is an element that takes part in many metabolic processes. It contributes to normal protein synthesis, to normal muscle function and to electrolyte balance. Magnesium also contributes to a reduction of tiredness and fatigue and to normal energy-yielding metabolism.

Potassium contributes to normal functioning of the nervous system, to normal muscle function and also to the maintenance of normal blood pressure.

B vitamins: thiamin, riboflavin, niacin, vit. B6, B12 and biotin contribute to normal functioning of the nervous system.

Intended use: as a food supplement that facilitates covering the body's demand for some vitamins, magnesium and potassium, which positively affect the proper functioning of the muscles, thus avoiding excessive contractions. Especially recommended for physically and mentally active people.

Recommended use: 1 tablet daily. Dissolve 1 tablet in 200 ml of water. It tastes best when chilled. Do not exceed the recommended daily dose. Food supplement should not be used as a substitute for a varied and balanced diet. A varied and balanced diet and a healthy lifestyle are recommended.

Warning: the preparation is not recommended during pregnancy and breastfeeding or in case of hypersensitivity to any of the constituents of the preparation.
