	75 µg (100%*)

Osteoblock™ Forte

Food supplement containing the blend of highly absorbable Albion™ chelated minerals (calcium, zinc, manganese), vitamin D and K – which contribute to the maintenance of normal bones. Calcium is the basic mineral component of bone tissue. Vitamin D contributes to normal absorption/utilisation of calcium and phosphorus, also helps to maintain a normal level of calcium in a blood.

Ingredients: calcium carbonate, calcium bisglycinate (calcium amino acid chelate Albion™), potato starch, coating [glazing agents – polyvinyl alcohol (PVA), magnesium phosphates, polyethylene glycol, talc], zinc bisglycinate (zinc amino acid chelate Albion™), anti-caking agent – magnesium salts of fatty acids; manganese bisglycinate (manganese amino acid chelate Albion™), menaquinone (menaquinone-7) – vitamin K, cholecalciferol – vitamin D.
